

Swanson papers on the behavioral neuroscience of motivation and emotion

1. Cicero, T.J., Snider, S.R., Perez, V.J., & Swanson, L.W. (1971) Physical dependence on and tolerance to alcohol in the rat. *Physiology and Behavior* **6**:191-198.
2. Swanson, L.W., Perez, V.J., & Sharpe, L.G. (1972) Accurate and reliable intracerebral delivery of minute volumes of drug solutions. *Journal of Applied Physiology* **33**:247-251.
3. Swanson, L.W., Marshall, G.R., Needleman, P., & Sharpe, L.G. (1973) Characterization of central angiotensin II receptors involved in the elicitation of drinking in the rat. *Brain Research* **49**:441-446.
4. Swanson, L.W., Sharpe, L.G., & Griffin, D. (1973) Drinking to intracerebral angiotensin II and carbachol: dose-response relationships and ionic involvement. *Physiology and Behavior* **10**:595-600.
5. Swanson, L.W. & Sharpe, L.G. (1973) Centrally induced drinking: comparison of angiotensin II- and carbachol-sensitive sites in rats. *American Journal of Physiology* **225**:566-573.
6. Sharpe, L.G. & Swanson, L.W. (1974) Drinking induced by injections of angiotensin into forebrain and mid-brain sites of the monkey. *Journal of Physiology* **239**:595-622.
7. Swanson, L.W. & Sharpe, L.G. (1977) Angiotensin II induced drinking: distribution of responsive central tissue sites in the rat, rabbit and monkey. In: *Central actions of angiotensin and related hormones*, Buckley, J.P & Ferrario, C.M., editors (New York: Pergamon Press) pp. 429-438.
8. Swanson, L.W., Kucharczyk, J., & Mogenson, G.J. (1978) Autoradiographic evidence for pathways from the medial preoptic area to the midbrain involved in the drinking response to angiotensin II. *Journal of Comparative Neurology* **178**:645-660.
9. Swanson, L.W. & Mogenson, G.J. (1981) Neural mechanisms for the functional coupling of autonomic, endocrine and somatomotor responses in adaptive behavior. *Brain Research Reviews*. **3**:1-34.
10. Swerdlow, N.R., Swanson, L.W., & Koob, G.F. (1984) Electrolytic lesions of the substantia innominata and lateral preoptic area attenuate the "supersensitive" locomotor response to apomorphine resulting from denervation of the nucleus accumbens. *Brain Research* **306**:141-148.
11. Swerdlow, N.R., Swanson, L.W., & Koob, G.F. (1984) Substantia innominata: critical link in the behavioral expression of mesolimbic dopamine stimulation in the rat. *Neuroscience Letters* **50**:19-24.
12. Mogenson, G.J., Swanson, L.W., & Wu, M. (1985) Evidence that projections from substantia innominata to zona incerta and mesencephalic locomotor region contribute to locomotor activity. *Brain Research* **334**:65-76.
13. Swanson, L.W., Mogenson, G.J., Simerly, R.B., & Wu, M. (1987) Anatomical and electro-physiological evidence for a projection from the medial preoptic area to the "mesencephalic and subthalamic locomotor regions" in the rat. *Brain Research* **405**:108-122.
14. Swanson, L.W. (1989) The neural basis of motivated behavior. *Acta Morphologica Neerlandica-Scandinavica* **26**:165-176.

15. Canteras, N.S., Chiavegatto, S., Ribeiro do Valle, L.E., & Swanson, L.W. (1997) Severe reduction of defensive behavior to a predator by discrete hypothalamic chemical lesions. *Brain Research Bulletin* **44**:297-305.
16. Petrovich, G.D., Scicli, A.P., Thompson, R.F., & Swanson, L.W. (2000) Associative fear conditioning of enkephalin mRNA levels in central amygdalar neurons. *Behavioral Neuroscience* **114**:681-686.
17. Swanson, L.W. (2000) Cerebral hemisphere regulation of motivated behavior. *Brain Research* **886**:113-164.
18. Watts, A.G. & Swanson, L.W. (2002) Anatomy of motivational systems. In: "Stevens" *Handbook of experimental psychology*, 3rd edition, Gallistel, R., editor (New York: John Wiley & Sons) pp. 563-631.
19. Scicli, A.P., Petrovich, G.D., Swanson, L.W., & Thompson, R.F. (2004) Contextual fear conditioning is associated with lateralized expression of the immediate early gene *c-fos* in the central and basolateral amygdalar nuclei. *Behavioral Neuroscience* **118**:5-14.
20. Choi, G.B., Dong, H.-W., Murphy, A.J., Valenzuela, D.M., Yancopoulos, G.D., Swanson, L.W., & Anderson, D.J. (2005) Lhx6 delineates a pathway mediating innate reproductive behaviors from the amygdala to the hypothalamus. *Neuron* **46**:647-660.
21. Swanson, L.W. (2005) Anatomy of the soul as reflected in the cerebral hemispheres: neural circuits underlying voluntary control of basic motivated behaviors. *Journal of Comparative Neurology* **493**:122-131.
22. Pfaff, D.W., Kieffer, B.L., & Swanson, L.W. (2008) Mechanisms for the regulation of state changes in the CNS: an introduction. *Annals of the New York Academy of Sciences* **1129**:1-7.
23. Motta, S.C., M. Goto, M., Gouveia, F.V., Baldo, M.V.C., Canteras, N.S., & Swanson, L.W. (2009) Dissecting the brain's fear system reveals the hypothalamus is critical for responding in subordinate conspecific intruders. *Proceedings of the National Academy of Sciences USA* **106**:4870-4875.
