

## **D. Gross Anatomical Features of the Rat PNS [1]**

### **SOMATIC NERVOUS SYSTEM (SMS)**

#### Cranial Components

##### Ganglia

- terminal ganglion (GTE)
- trigeminal ganglion (GV)
- geniculate ganglion (GgVII)
- spiral ganglion (GcVIII)
- vestibular ganglion (GvVIII)
- proximal glossopharyngeal ganglion (GpIX)
- distal glossopharyngeal ganglion (GdIX) [2]
- proximal vagal ganglion (GpX)
- distal vagal ganglion (GdX) [3]

#### Plexuses

#### Nerves

#### Spinal Components

##### Ganglia

- cervical 1-8 (G-C1-8)
- thoracic 1-13 (G-T1-13)
- lumbar 1-6 (G-L1-6)
- sacral 1-4 (G-S1-4)
- coccygeal 1-3 (G-Co1-3)

#### Plexuses

- cervical (cep)
- brachial (bp)
- lumbosacral (lsp)

pudental (pup)

Nerves

phrenic (phn)

## AUTONOMIC NERVOUS SYSTEM (ANS)

Sympathetic Nervous System (SNS)

Sympathetic trunk (S)

Ganglia

superior cervical ganglion (GSC) [4]

middle cervical ganglion (GMC) [5]

stellate ganglion (GSTL) [6]

thoracic sympathetic ganglia T3-T13 (Gs-T3-13)

lumbar sympathetic ganglia S1-S4 (Gs-S1-4) [7]

coccygeal sympathetic ganglion (Gs-C)

Prevertebral sympathetic ganglia (GPRS)

coeliac ganglion (GCE) [8]

superior mesenteric ganglion (GSM)

inferior mesenteric ganglion (GIM)

Nerves

splanchnic nerves (spn)

Parasympathetic Nervous System (PSN)

Cranial division (PSNc)

ciliary ganglion (GcIII)

pterygopalatine ganglion (GptVII) [9]

otic ganglion (GoIX)

Sacral division (PSNs)

pelvic ganglion (GPE) [10]

Enteric Nervous System (ENS) [11]

Submucosal plexus (sup)

Myenteric plexus (myp)

**Gross Anatomical Features of the Rat PNS (Footnote Annotations)**

- 1 Greene 1968; Hebel and Stromberg 1986. Parts of the major divisions in this list are very incomplete; by and large, only those parts referred to in the figures are included.
