Dr. Larry Swanson has headed basic research laboratories in systems neuroscience at the Washington University School of Medicine (St. Louis), Salk Institute for Biological Studies, and University of Southern California. He is best known for discoveries related to the basic plan of neural systems controlling motivated and emotional behavior using experimental, neuroinformatics, and historical methods.

Swanson's early behavioral research distinguished the periventricular hypothalamus as a key hotspot for controlling the fundamental survival behaviors eating and drinking that are accompanied by the corresponding drives, hunger and thirst. This finding stimulated his interest in discovering the basic structure-function organization of the brain subsystem underlying motivation and emotion in mammals. Data emerging from this work led naturally to current interests in explaining mechanisms of human and animal behavior—in health, in disease, and following traumatic injury—based on a novel global structure-function wiring diagram of the nervous system using a combination of experimental and theoretical approaches.

The paraventricular nucleus (PVH) of the periventricular hypothalamus is a key controller of eating and drinking behavior and early research by Dr. Swanson's group discovered a highly differentiated structure-function architecture of the PVH. They also demonstrated how individual PVH parts are integrated into anatomically and molecularly-defined neural circuits ranging from the hippocampus, amygdala, and prefrontal cortex in front, to the brainstem and spinal cord in back. Based on this circuit model, the group went on to define hypothalamic controllers for the other two classes of fundamental behaviors common to all animals—defensive (“fight or flight” to threats in the environment for survival of the individual) and reproductive (sexual and parental behaviors for survival of the species). This led to the identification of a longitudinal behavior control column in the medial hypothalamus and midbrain, along with similar though specialized circuitry associated with each node in the column. To date, this research has identified over 6,000 new axonal connections in the rodent central nervous system with experimental pathway tracing methods, and since 1992 they have been mapped onto common digital atlas and flatmap templates for direct comparison of connectivity and gene expression patterns.

A second early line of research in this fundamentally important mammalian brain circuitry uncovered the possibility of molecular switching of information flow in adult brain neural circuitry that may be regarded as structurally stable. The initial discovery was a dramatic change in the ratio of coexpressed neurotransmitters within individual rat PVH neurons caused by adrenal steroid hormones (Proceedings of the National Academy of Sciences, 1983). Similar results based on immunohistochemistry and in situ hybridization demonstrated altered neurotransmitter expression ratios in neurons of the reproductive-defensive behavior circuitry driven by the cyclical gonadal steroid levels associated with the

estrus cycle in female rats (Proceedings of the National Academy of Sciences, 1987, 1989), and even accompanying the expression of associative fear conditioning in neurons of the amygdala (Behavioral Neuroscience, 2000). Overall, this line of research led to the phenotyping of neuron types based on three fundamental criteria: axonal connections, spatial distribution, and differential gene expression patterns for sets of transcription factors and neurotransmitter-related molecules (Progress in Brain Research, 1992).

These structure-function circuit analysis results involve most parts of central nervous system, and it is now clear that the mechanistic, biological explanation of behavior, thinking, and feeling requires understanding the basic organizing principles of the entire nervous system. The results of this research stimulated Dr. Swanson to produce:

- *The first computer graphics atlas of the brain accompanied by a unique set of hierarchically organized nomenclature tables (for rat 1992, 1998, 2004, 2018; for human: Oxford University Press, 2014). The standard rat brain atlas is now an open access resource on the internet.*
- *The first online knowledge management system for mammalian neural connectivity (BAMS: Nature Neuroscience, 2003). It is now being superseded by [The Neurome Project](#).*
- *A Foundational Model of Connectivity (Proceedings of the National Academy of Sciences, 2010), a formal modeling language for neural circuitry in all animals (NSyL: Journal of Comparative Neurology, 2013).*
- *A global structure-function model of vertebrate nervous system organization (Brain Architecture: Understanding the Basic Plan (Oxford University Press, 2003, 2012).*
- *And a prototype “Google maps” website for the brain (Frontiers in Neuroinformatics, 2015).*

These tools, combined with the three criteria for defining neuron types (connections, location, and gene expression patterns), are foundational to Dr. Swanson’s current efforts to help create a complete connectome—and accompanying wiring diagram—of the mammalian nervous system—a neurome complementary to the genome (Proceedings of the National Academy of Sciences, 2015, 2016, 2017).

Dr. Swanson has been a member of the Society for Neuroscience (SfN) since 1970 and served as its president in 2012-2013. He has also been a member of the Cajal Club since 2002 and served as its president from 2004-2006. In 2015, he was elected to serve as Secretary General of the International Brain Research Organization (IBRO). He was elected a Fellow of the American Academy of Arts and Sciences in 2003 and a Member of the National Academy of Sciences in 2010. He is also a member of the Dana Alliance for Brain Initiatives (2005) and the Grolier Club (2010). He has received numerous awards including a Doctor of Laws (honoris causa) from Concordia University (shared with Eric Kandel; Montreal, 2003), an Alfred P. Sloan Research Fellowship, the Charles Judson Herrick Award in Comparative Neurology, a McKnight Foundation Neuroscience Investigator Award, two Senator Jacob Javits Distinguished Neuroscience Investigator Awards from NINDS, and the Institute of Neurobiology Medal for Outstanding Achievements in Neuroscience Research from UNAM. In addition, he was one of the 100 most cited scientific researchers of the 1980s (one of the two most cited neuroscientists) according to the Institute for Scientific Information.

Dr. Swanson has served on numerous editorial boards, including the Journal of Neuroscience, Trends in Neuroscience, European Journal of Neuroscience, Molecular and Cellular Neurosciences, Journal of Comparative Neurology, Brain Research Reviews, and the Journal of the History of the Neurosciences. He has also served on numerous committees including an NIH Study Section (1981-1985), the McKnight Foundation Scholars Review Committee (1986-1995), the Institute of Medicine's Committee on a National Neural Circuitry Database (1989-1990), the Hereditary Disease Foundation Board of Scientific Advisors (1996-2000), Renovis Inc. Scientific Advisory Board (2001-2003), the NIMH Board of Scientific Councilors (2006-2011), the Allen Institute for Brain Science Advisory Council for the Human Gene Expression Brain Atlas Project (2007-2011), and the Mount Sinai Friedman Brain Institute External Advisory Committee (2010-present).

Dr. Swanson has also presented many prestigious lectures. A partial list includes 13 Grass Foundation Lectures sponsored by the Society for Neuroscience (1983-2006), the Jan Swammerdam Lecture (Amsterdam, 1988), the Jerzy Olszewski Lecture (Montreal, 1989), Plenary Lectures at the European Brain and Behavior Society (Stockholm, 1990), 2nd International Congress of Chinese Anatomical Sciences (Beijing, 1992), and Canadian Federation of Biological Societies (Windsor, 1993), Presidential Plenary Lecture for Society of Biological Psychiatry's 50th Anniversary Meeting (New York City, 1996), Special Lecture at Society for Neuroscience (Los Angeles, 1998), McKnight Foundation President's Lecture (Aspen, 2004), Overseas Plenary Lecture for Australian Neuroscience Society's Silver Jubilee (Perth, 2005), Presidential Symposium Lecture for American Neuropsychiatric Association (Savannah, 2008), History of Neuroscience Lecture at Society for Neuroscience (Chicago, 2009), Invited Lecture for Salk Institute's 50th Anniversary Symposium (La Jolla, 2010), Joseph Erlanger Lecture for American Physiological Society (Washington, 2011), Pinckney J. Harman Memorial Lecture for Cajal Club (Barcelona, 2012), Segerfalk Lecture at University of Lund (2013), Edward G. Jones History of Neuroscience Lecture at University of California, Davis (2015), and Annual Neuroscience Founders Lecture, University of California, San Diego (2016).

Dr. Swanson has also performed various administrative duties, including Chair of the Neuroscience Committee at the Salk Institute (1989-1990). Since coming to USC he has been a member of the Faculty Senate Executive Committee (1992-1993), was Dean of Research for the College of Letters, Arts, and Sciences under Morton O. Schapiro (1998-2000), and Co-Chaired the Research and Innovation subcommittee of the USC Strategic Planning Committee (2010-2011). In addition, he was Director of the Research and Graduate Program in Neurobiology (1993-1997), Founding Coordinator of the university-wide Neuroscience Graduate Program (1996-2004), Director of the university-wide NIBS-Neuroscience Program (2001-2004), and Chair of the Provost's Neuroscience Advisory Group (2001-2006).

Dr. Swanson is a prolific author. He has written five books, translated with Neely Swanson three books written by the founder of modern neuroscience, Santiago Ramón y Cajal, and edited or co-edited seven other books. He has published over 200 peer reviewed research articles and over 70 chapters and reviews. In 2017 Google Scholar identified about 72,000 citations for Dr. Swanson's work, with an h-index of 130 and an i10-index of 263.

DEGREES

- 1972 **Ph.D. in Neurobiology**
Washington University School of Medicine, St. Louis
(L.G. Sharpe mentor, Laboratory of Neuropsychology, Dept. of Psychiatry; Eli Robbins chair)
- 1968 **B.A. in Chemistry**; Pomona College, Claremont CA

APPOINTMENTS

- 2012, 2018 **Visiting Professor**
Department of Neuroscience; Columbia University, New York NY
- 2012-Present **University Professor**; University of Southern California, Los Angeles CA
- 2007-2013 **Visiting Scholar**; Department of Neurobiology, University of California Los Angeles
- 1995-Present **Appleman Professor of Biological Sciences, Neurology, and Psychology**
University of Southern California, Los Angeles CA
- 1990-Present **Professor**
Departments of Biological Sciences, Neurology, and Psychology; USC, Los Angeles CA
- 1985-1990 **Investigator**
Howard Hughes Medical Institute, The Salk Institute for Biological Studies, La Jolla CA
- 1980-1986-1990 **Senior Member from Staff Scientist**
The Salk Institute for Biological Studies, La Jolla CA
- 1980-1983-1986-1990 **Assistant Adjunct Professor to Adjunct Professor**
Department of Neurosciences, University of California San Diego, School of Medicine
- 1979-1980 **Assistant Professor of Neurobiology**
Department of Anatomy and Neurobiology, Washington University School of Medicine, St. Louis
- 1979 **Visiting Assistant Professor**
Department of Anatomy (H.G.J.M. Kuypers lab), Erasmus University, Rotterdam, Netherlands
- 1978 **Visiting Associate Professor**
Institute of Anatomy (W. Harkmark laboratory), University of Bergen, Bergen, Norway
- 1976-1979 **Research Assistant Professor of Neurobiology**
Department of Anatomy and Neurobiology, Washington University School of Medicine, St. Louis
- 1974-1976 **Postdoctoral Fellow/Research Associate**
Department of Biology (R. Levi-Montalcini laboratory), Washington University, St. Louis MO
- 1972-1974 **Postdoctoral Fellow**
Department of Anatomy (W.M. Cowan laboratory), Washington University, St. Louis MO

AWARDS

- 1977-1980 **Alfred P. Sloan Foundation Research Fellowship in Neuroscience**
- 1980 **C.J. Herrick Award** (American Association of Anatomists)
- 1985-1987 **McKnight Foundation Neuroscience Investigator Award**
- 1986-1993 **Senator Jacob Javits Distinguished Neuroscience Investigator Award from NINDS**
- 1991 **100 most cited scientific researchers of the 1980s** (one of two most cited neuroscientists)
Institute for Scientific Information (*Current Contents* **13**:4-8, 1992)
- 1996 **Albert S. Raubenheimer Award** (USC College of Letters, Arts & Sciences award for distinguished Faculty in combined research, teaching, and service)
- 2001 **100 most cited neuroscience researchers, 1980-2000** (Institute for Scientific Information)
- 2003 **Doctor of Laws** (*honoris causa*), Concordia University, Montreal (awarded with Eric Kandel)
- 2005 **USC Associates Award for Research** (the University's highest research award)
- 2006-2013 **2nd Senator Jacob Javits Neuroscience Investigator Award from NINDS**
- 2013 **Institute of Neurobiology Medal and Lecture for Outstanding Achievements in Neuroscience Research**, National Autonomous University of Mexico (UNAM), Juriquilla Campus, Querétaro

MEMBERSHIPS

- 1971-Present Society for Neuroscience (**Secretary**, 1998-2000; **President**, 2012-2013)

TEACHING

Teaching:

1. *Neural Sciences*. Washington University School of Medicine (E.G. Jones, coursemaster). 1973-1977. Laboratory lectures and instruction.
2. *Human Anatomy*. Washington University School of Medicine (R. Peterson, coursemaster). 1978-1979. Twelve lectures a year and full laboratory.
3. *Introduction to Neural Sciences*. Washington University (W.M. Cowan, coursemaster). 1978. Led undergraduate student discussion groups.
4. *Mammalian Neuroanatomy*. Department of Neurosciences, University of California, San Diego. Yearly, 1982-1989. Core course for graduate students. Gave all lectures (28) and directed laboratory.
 - 1991-1998. Department of Biological Sciences, University of Southern California. Survey course for graduate students offered every two or three years.
5. *Advanced Neurobiology*. 1990-1997. Core course for graduate students, spread over two semesters. Gave one-third of lectures, for neuroanatomy section of course.
6. *Neuroscience Graduate Program Core Course*. 2003-2005. Basically the same as preceding item. 2006-2012: give opening 1-3 lectures; overview and introduction to development.
7. *Advanced General Biology: Cell Biology and Physiology*. 1991-1997, 2002-2003, 2006-11, 2014-2016. Introductory course for honors Biology majors (about 60). Give lectures (20) for animal form and function half of course.
8. *Advanced Topics in Neuroanatomy*. 1994.
9. *Seminar in Neurobiology: Brain Control of the Emotions*. 2007, 2008 Spring, 2008 Fall (BISC462). Advanced undergraduate/graduate 2 unit course; gave all lectures and also led “journal club” session each week.
10. *Brain Architecture*. 2010 (BISC424). Course for advanced undergraduates and graduate students. Gave all 40 lectures, and co-led 15 discussion sections on interpreting human brain scans with Dr. Floyd Gilles.
11. *Thinking about the Brain*. 2011, 2012 (FSEM180). Freshman seminar in the Dornsife College of Letters, Arts & Sciences, given as a distinguished Dornsife Fellow (two-year appointment). Led 2-hour lecture discussion for 16-19 students once a week for the semester.
12. *Neuroscience Honors Seminar and Theses*, 2014 (NEUR/BISC493-494) Course for about 10 advanced neuroscience undergraduates. Co-taught weekly sessions with Jason Zevin.
13. *Brain Architecture*. 2017 (BISC424). Course (4 units) for advanced undergraduates and graduate students. Gave all lectures.
